

NOTRE DAME JOURNAL OF FORMAL LOGIC

VOLUME 27, 1986

VOLUME CONTENTS

Avron, Arnon , On purely relevant logics	180–194
Avron, Arnon , On an implication connective of RM	201–209
Baaz, Matthias , Kripke-type semantics for Da Costa's paraconsistent logic C_w	523–527
Barwise, Jon , Information and circumstance	324–338
Bencivenga, Ermanno , Analyticity and analytical truth	14–19
Bencivenga, Ermanno and Karel Lambert , A free logic with simple and complex predicates	247–256
Blass, Andreas , Near coherence of filters, I: Cofinal equivalence of models of arithmetic	579–591
Broesterhuizen, Guus and J. Wierzejewski , Identities and indiscernibility	592–605
Bruce, Kim B. , Model constructions in stationary logic. II: Definable ultrapowers	257–262
Butrick, Richard , Systems of sentence logic with trans-atomic units	565–571
Clark, Romane , Predication and paronymous modifiers	376–392
Cohen, Daniel H. , A new axiomatization of Belnap's conditional assertion	124–132
Daniels, Charles , A story semantics for implication	221–246
Dau, Paolo , Russell's first theory of denoting and quantification	133–166
Dougherty, Daniel J. , Gentzen systems, resolution, and literal trees	483–503
Dywan, Zdzislaw , A new variant of the Gödel-Malcev theorem for the classical propositional calculus and correction to my paper—The connective of necessity of modal logic S_5 is metalogical	551–555
Engelbretsen, George , Czeżowski on wild quantity	62–65
Engelbretsen, George , Singular/general	104–107
