### **Aspects of Incompleteness**

Lecture Notes in Logic, 10 (second edition)

Per Lindström

2003; Paperback; ISBN: 1-56881-173-X; 177 pp; \$35.00

**ASL member price: \$28.00**

This thoroughly revised second edition of a classic book on the main ideas and results of general meta-mathematics contains new results and simplified proofs, as well as an up-to-date bibliography. In addition to the standard results of Gödel and others on incompleteness, (non-) finite axiomatizability, interpretability, etc., it contains a thorough treatment of partial conservativity and degrees of interpretability.

Use as a textbook for a graduate course and as a reference for researchers.

### **The Honors Class: Hilbert's Problems and Their Solvers**

Ben Yandell

*I particularly recommend **The Honors Class** as an outstanding achievement of mathematical exposition.*

*Read it yourself and recommend it to all lovers of mathematics.*
