### CONTENTS

**Papers Communicated:—**

	Page
H. KOMATSU: The Implicit Function Theorem for Ultradifferentiable Mappings . . . . .	69
M. SATO, T. MIWA, and M. JIMBO: Studies on Holonomic Quantum Fields. XII . . . . .	73
M. YAMAGUTI and H. MATANO: Euler's Finite Difference Scheme and Chaos . . . . .	78
M. YASUMOTO: Finitely Additive Measures on $N$ . . . . .	81
L. STOICA: On Excessive Functions . . . . .	85
S. IITAKA: On the Homogeneous Lüroth Theorem . . . . .	88
Y. MOTOHASHI: A Note on the Large Sieve. III . . . . .	92
R. TSUSHIMA: Rational Maps to Varieties of Hyperbolic Type . . . . .	95
M. TANAKA: Experiments Concerning the Distribution of Squarefree Numbers . . . . .	101
T. FUJITA: On Zariski Problem . . . . .	106
T. SHIODA: The Hodge Conjecture and the Tate Conjecture for Fermat Varieties . . . . .	111
Proceedings at the 727th General Meeting . . . . .	VII
