

ERRATA  
CORRECTION TO  
A CONVEXITY THEOREM FOR SEMISIMPLE  
SYMMETRIC SPACES

KARL-HERMANN NEEB

Volume **162**, (1992), 305–349

The statement of Lemma II.14 is not correct.

One has to add the additional hypothesis that  $\overline{C}$  intersects  $E' \setminus \bigcup \mathcal{H}'$  to guarantee that  $C' \neq \emptyset$ . The only place in the paper where this lemma is referred to is Theorem II.15, where the additional hypothesis is satisfied.
