

Journal of Mathematics

M. M. Bayer , Barycentric subdivisions	1
E.-C. Cho , s -Smith equivalent representations of dihedral groups	17
A. Friedman and J. Necas , Systems of nonlinear wave equations with nonlinear viscosity	29
K. T. Hahn , Non-tangential limit theorems for normal mappings	57
E. Hamann, E. Houston and J. L. Johnson , Properties of uppers to zero in $R[x]$. .	65
J. M. S. Menéndez , On a theorem due to Cassels	81
C. Moen , Irreducibility of unitary principal series for covering groups of $SL(2, k)$.	89
F. Neubrander , Integrated semigroups and their applications to the abstract Cauchy problem	111
C. K. Qu and R. Wong , Szegő's conjecture on Lebesgue constants for Legendre series	157
J. B. Sullivan , The Euler character and cancellation theorems for Weyl modules . .	189
