

# Pacific Journal of Mathematics

<b>C. J. K. Batty</b> , Derivations on the line and flows along orbits . . . . .	209
<b>P. Erdős, A. Hildebrand, A. Odlyzko, P. Pudaite and B. Reznick</b> , The asymptotic behavior of a family of sequences . . . . .	227
<b>G. J. Galloway</b> , A note on the fundamental group of a compact minimal hypersurface . . . . .	243
<b>N. Higson</b> , A characterization of $KK$ -theory . . . . .	253
<b>A. T.-M. Lau and W. Takahashi</b> , Weak convergence and non-linear ergodic theorems for reversible semigroups of nonexpansive mappings . . . . .	277
<b>P. Menal and J. Moncasi</b> , Lifting units in self-injective rings and an index theory for Rickart $C^*$ -algebras . . . . .	295
<b>Y. Saitō</b> , Schrödinger operators with a nonspherical radiation condition . . . . .	331
<b>L. Smith</b> , Realizing certain polynomial algebras as cohomology rings of spaces of finite type fibered over $\times BU(d)$ . . . . .	361
<b>C. Swenson and C. Long</b> , Necessary and sufficient conditions for simple $A$ -bases . . . . .	379
<b>K. G. Valente</b> , The $p$ -primes of a commutative ring . . . . .	385
