

Pacific Journal of Mathematics

P. M. Anselone and M. L. Treuden , Regular operator approximation theory	257
G. Baccella , Semiprime \aleph -QF 3 rings	269
E. Berkson and T. A. Gillespie , The generalized M. Riesz Theorem and transference	279
J. Boidol , A Galois-correspondence for general locally compact groups	289
J. E. D'Atri, J. Dorfmeister and Z. Y. Da , The isotropy representation for homogeneous Siegel domains	295
C. Debieve , On Banach spaces having a Radon-Nikodym dual	327
M. A. Freedman , Existence of strong solutions to singular nonlinear evolution equations	331
F. J. Freniche , Grothendieck locally convex spaces of continuous vector valued functions	345
H.-P. Künzi and P. Fletcher , Extension properties induced by complete quasi-uniformities	357
T. Kusano, C. A. Swanson and H. Usami , Pairs of positive solutions of quasilinear elliptic equations in exterior domains	385
A. Larotonda and I. Zalduendo , Spectral sets as Banach manifolds	401
J. Martinez Maurica and C. Perez Garcia , A new approach to the Krein-Milman theorem	417
Ch. Pommerenke , On the boundary continuity of conformal maps	423
M. V. Subbarao , Some Rogers-Ramanujan type partition theorems	431
S. E. Wilson , Bicontactual regular maps	437
J. van der Woude , Characterizations of (H)PI extensions	453
K. Yang , Deformation of submanifolds of real projective space	469
Errata	493
