

# Pacific Journal of Mathematics

Alfred Aeppli, <i>Some exact sequences in cohomology theory for Kähler manifolds</i> .....	791
Paul R. Beesack, <i>On the Green's function of an <math>N</math>-point boundary value problem</i> .....	801
J. R. Boen, <i>On <math>p</math>-automorphic <math>p</math>-groups</i> .....	813
J. Boen, O. Rothaus and J. Thompson, <i>Further results on <math>p</math>-automorphic <math>p</math>-groups</i> .....	817
J. H. Bramble and L. E. Payne, <i>Bounds in the Neumann problem for second order uniformly elliptic operators</i> .....	823
C. C. Chang and H. Jerome Keisler, <i>Applications of ultraproducts of pairs of cardinals to the theory of models</i> .....	835
Stephen U. Chase, <i>On direct sums and products of modules</i> .....	847
Paul Civin, <i>Annihilators in the second conjugate algebra of a group algebra</i> .....	855
J. H. Curtiss, <i>Polynomial interpolation in points equidistributed on the unit circle</i> .....	863
M. K. Fort, Jr., <i>Homogeneity of infinite products of manifolds with boundary</i> .....	879
James Glimm, <i>Families of induced representations</i> .....	885
Daniel Gorenstein, Reuben Sandler and W. H. Mills, <i>On almost-commuting permutations</i> .....	913
V. C. Harris and M. V. Subba Rao, <i>Congruence properties of <math>\sigma(N)</math></i> .....	925
Harry Hochstadt, <i>Fourier series with linearly dependent coefficients</i> .....	929
Kenneth Hoffman and John Wermer, <i>A characterization of <math>C(X)</math></i> .....	941
Robert W. Hunt, <i>The behavior of solutions of ordinary, self-adjoint differential equations of arbitrary even order</i> .....	945
Edward T. Kobayashi, <i>A remark on the Nijenhuis tensor</i> .....	963
David London, <i>On the zeros of the solutions of <math>w''(z) + p(z)w(z) = 0</math></i> .....	979
G. R. MacLane and F. B. Ryan, <i>On the radial limits of Blaschke products</i> .....	993
T. M. MacRobert, <i>Evaluation of an <math>E</math>-function when three of its upper parameters differ by integral values</i> .....	999
Robert McKelvey, <i>The spectra of minimal self-adjoint extensions of a symmetric operator</i> .....	1003
A. Olubummo, <i>Operators of finite rank in a reflexive Banach space</i> .....	1023
David A. Pope, <i>On the approximation of function spaces in the calculus of variations</i> .....	1029
Bernard W. Roos and Ward C. Sangren, <i>Three spectral theorems for a pair of singular first-order differential equations</i> .....	1047
Arthur A. Sagle, <i>Simple Malcev algebras over fields of characteristic zero</i> .....	1057
Leo Sario, <i>Meromorphic functions and conformal metrics on Riemann surfaces</i> .....	1079
Richard G. Swan, <i>Factorization of polynomials over finite fields</i> .....	1099
S. C. Tang, <i>Some theorems on the ratio of empirical distribution to the theoretical distribution</i> .....	1107
R. C. Thompson, <i>Normal matrices and the normal basis in Abelian number fields</i> .....	1115
Howard G. Tucker, <i>Absolute continuity of infinitely divisible distributions</i> .....	1125
Elliot Carl Weinberg, <i>Completely distributive lattice-ordered groups</i> .....	1131
James Wells, <i>A note on the primes in a Banach algebra of measures</i> .....	1139
H. C. Wisner, <i>Decomposition and homogeneity of continua on a 2-manifold</i> .....	1145
