

Pacific Journal of Mathematics

CONTENTS

W. F. Donoghue, Jr., <i>The lattice of invariant subspaces of a completely continuous quasinilpotent transformation</i> ..	1031
M. Fekete and J. L. Walsh, <i>Asymptotic behavior of restricted extremal polynomials and of their zeros</i> ..	1037
S. R. Foguel, <i>Biorthogonal systems in Banach spaces</i>	1065
David Gale, <i>A theorem on flows in networks</i>	1073
I. M. James, <i>On spaces with a multiplication</i>	1083
Richard V. Kadison and I. M. Singer, <i>Three test problems in operator theory</i>	1101
Maurice Kennedy, <i>A convergence theorem for a certain class of Markoff processes</i>	1107
G. Kurepa, <i>On a new reciprocity, distribution and duality law</i>	1125
Richard K. Lashof, <i>Lie algebras of locally compact groups</i> ..	1145
Calvin T. Long, <i>Note on normal numbers</i>	1163
M. Mikolás, <i>On certain sums generating the Dedekind sums and their reciprocity laws</i>	1167
Barrett O'Neill, <i>Induced homology homomorphisms for set-valued maps</i>	1179
Mary Ellen Rudin, <i>A topological characterization of sets of real numbers</i>	1185
M. Schiffer, <i>The Fredholm eigen values of plane domains</i> ..	1187
F. A. Valentine, <i>A three point convexity property</i>	1227
Alexander Doniphan Wallace, <i>The center of a compact lattice is totally disconnected</i>	1237
Alexander Doniphan Wallace, <i>Two theorems on topological lattices</i>	1239
G. T. Whyburn, <i>Dimension and non-density preservation of mappings</i>	1243
J. H. Williamson, <i>On the functional representation of certain algebraic systems</i>	1251
