

# Pacific Journal of Mathematics

<b>C.-H. Fang and M. Eie,</b> On the values of a zeta function at non-positive integers	201
<b>H. D. Fegan, B. Steer, and L. Whiteway,</b> Spectral symmetry of the Dirac operator for compact and noncompact symmetric pairs . . . . .	211
<b>W. Heinzer and D. Lantz,</b> Integral domains that lose ideals in overrings . . . . .	223
<b>A. E. Koonce,</b> Relations among generalized characteristic classes . . . . .	239
<b>M. S. Narasimhan and G. Trautmann,</b> Compactification of $M_{\mathbb{P}_3}(0, 2)$ and Poncelet pairs of conics . . . . .	255
<b>J. A. Reeds and L. A. Shepp,</b> Optimal paths for a car that goes both forwards and backwards . . . . .	367
<b>A. N. Wang,</b> Constant mean curvature surfaces on a strip . . . . .	395
