

Pacific Journal of Mathematics

A. Connes and E. J. Woods , Hyperfinite von Neumann algebras and Poisson boundaries of time dependent random walks	225
R. Coquereaux and D. Kastler , Remarks on the differential envelopes of associative algebras	245
U. Haagerup , The injective factors of type III_λ , $0 < \lambda < 1$	265
V. F. R. Jones , On knot invariants related to some statistical mechanical models	311
P. S. Muhly, K.-S. Saito and B. Solel , Coordinates for triangular operator algebras II	335
K. Schmidt , Mixing automorphisms of compact groups and a theorem by Kurt Mahler	371
I. Segal , Algebraic characterization of the vacuum for quantized fields transforming non-unitarily	387
C. E. Sutherland and M. Takesaki , Actions of discrete amenable groups on injective factors of type III_λ , $\lambda \neq 1$	405
