Articles

| | |
|--|---------|
| N. Cónsul, S. M. Oliva, M. Pellicer , A PDE approach of inflammatory phase dynamics in diabetic wounds | 265–293 |
| L. Szpiro, M. Tepper, P. Williams , Resultant and conductor of geometrically semi-stable self maps of the projective line over a number field or function field | 295–329 |
| M. De Falco, F. de Giovanni, C. Musella , Groups with normality conditions for subgroups of infinite rank | 331–340 |
| B. Matei, Y. Meyer, J. Ortega-Cerdà , Stable sampling and Fourier multipliers | 341–351 |
| Z. Chen, W. Ouyang , Atomic decomposition of real-variable type for Bergman spaces in the unit ball of \mathbb{C}^n | 353–377 |
| T. Heikkinen, H. Tuominen , Smoothing properties of the discrete fractional maximal operator on Besov and Triebel–Lizorkin spaces | 379–399 |
| E. Amar , On separated Carleson sequences in the unit disc | 401–414 |
| A. Osękowski , On restricted weak-type constants of Fourier multipliers | 415–443 |
| A. J. Yucra Hanco, G. A. Lobos, V. Ramos Batista , Explicit minimal Scherk saddle towers of arbitrary even genera in \mathbb{R}^3 | 445–468 |
| J. A. Cuenca Mira , Third-power associative absolute valued algebras with a nonzero idempotent commuting with all idempotents | 469–484 |
| A. Greco , Comparison principle and constrained radial symmetry for the subdiffusive p -Laplacian | 485–498 |
| D. Skodlerack , Embeddings of local fields in simple algebras and simplicial structures | 499–516 |
| F. Nazarov, X. Tolsa, A. Volberg , The Riesz transform, rectifiability, and removability for Lipschitz harmonic functions | 517–532 |
