

EDITORIAL MESSAGES

By Paul D. Humke and Clifford E. Weil

Thanks. The Managing Editors wish once again to thank Gabriela Ene, who again typed manuscripts for this issue. We also extend thanks and best wishes to Katy Jensen, who has prepared her last manuscripts after working with Paul Humke at St. Olaf College for three years. She has graduated and will begin a graduate program next fall at Iowa State University studying statistics. We wish her success. Thanks also to Valerie Golda, who assisted Cliff Weil with his editorial duties. This will end her association with the *Real Analysis Exchange* as well. We wish her well in her new endeavors.

RAEX on-line. The on-line version of the *Real Analysis Exchange* that we announced in the previous issue is now ready. Until October 31 we are allowing anyone to use it free of charge. In particular we would like all of our subscribers to try it and send us your comments. To log on follow the following instructions.

Once you have used the site, please send any comments you have by e-mail to analysis@stolaf.edu. We express our gratitude to Gabriela Ene for designing and writing the code for the site.

MSU Press. If any of our readers is contemplating writing a book, either a text book or a memoir on a subject in mathematics, please consider the MSU Press for your publisher. They are affiliated with Michigan State University and are, therefore, a non-profit organization. For that reason their publication costs are much lower than commercial publishers and they will advertise your book or memoir in *Real Analysis Exchange* free of charge.

Website. We invite you to visit our Website and tell us what else you would like to see there. The address is
