

EDITORIAL MESSAGES

By Paul D. Humke

Thanks. I'd like to thank David Swanson, Sarah Spragues and Lyle Smith for their help as Assistant Editors. Throughout his undergraduate years at St. Olaf College, David has worked for the *Exchange*, contributing greatly to the success of the journal. He will continue his education in the biostatistics Ph.D. program at Harvard University. Sarah is a rising third year student at St. Olaf and will continue her work with the *Exchange* as will Lyle who continues his graduate program at the University of Louisville. Joseph McDonald is a rising third year student at Washington and Lee University and joined our team of Assistant Editors in May. I personally owe a great debt of gratitude to these capable and dedicated people.

There are many people the journal depends on, and no one more than Gabriella Ene who set three papers in L^AT_EX for this issue alone. Thanks also to Manav Das, Lee Larson, and Cliff Weil for the many extra hours they've spent working behind the scenes to do whatever work was required.

Advertisements. Please note the advertisements at the end of each issue, which may be of interest to *Real Analysis Exchange* readers. Others promote Michigan State University Press publications and therefore help support the production of the *Exchange*. If you have written a book, or have an item of interest you wish to publicize in the Journal, please contact the Michigan State University Press Journals Division.

Michigan State University Press. If you are considering writing a mathematics textbook or memoir, please consider using the Michigan State University Press as your publisher. The Press is a non-profit organization affiliated with Michigan State University that offers superior service and much lower costs than commercial publishers along with complimentary advertising in the *Real Analysis Exchange*.
