

VOLUME 21 NO. 1 1995–96

REAL ANALYSIS EXCHANGE

CONTENTS

EDITORIAL MESSAGES	1
CONFERENCE ANNOUNCEMENTS	2
CONFERENCE REPORTS	5
Table of Contents	13
TOPICAL SURVEY	
A. M. Bruckner	
The problem of characterizing derivatives revisited	112
RESEARCH ARTICLES	
J. Bobok and M. Kuchta	
Register shifts versus transitive f -cycles for piecewise monotone maps	134
K. Ciesielski	
Uniformly antisymmetric functions and K_5	147
R. C. Powers and T. Riedel	
When are continuous isotone bijections order automorphisms?	154
M. J. Evans and R. J. O'Malley	
Fine tuning the recoverability of Baire one functions	165
Z. Grande	
On some representations of a.e. continuous functions	175
T. H. Steele	
The topological structure of attractors for differentiable functions	181
M. McClure	
Entropy dimensions of the hyperspace of compact sets	194
K. Banaszewski	
On \mathcal{E} -continuous functions	203
D. J. F. Nonnenmacher	
A constructive definition of the n -dimensional $\nu(S)$ -integral in terms of Riemann sums	216
Z. Grande	
On strong quasi-continuity of functions of two variables	236
H. P. Heinig and A. L. Lee	
Sharp Paley-Titchmarsh inequalities in Orlicz spaces	244
A. Maliszewski	
Differences of Darboux u.s.c. functions	258
M. S. Osborne	
Convergence and Kolmogorov dimension	264
V. A. Skvortsov	
Continuity of δ -variation and continuous major and minor functions for the Perron integral	270
J. Hejduk and A. Kharazishvili	
On density points with respect to von Neumann's topology	278
H. Fejzić and Dan Rinne	
Continuity properties of Peano derivatives in several variables	292
H. Rosen	
Every real function is the sum of two extendable connectivity functions	299
