

# EDITORIAL MESSAGES

By Paul D. Humke

**Thanks.** Thank you to Margaret (Maggy) Flint of St. Olaf College for her dedicated work as an Assistant Editor during this past year. Maggie's help is absolutely invaluable to the production of the *Exchange*.

Thanks also to Marcia Federson and her crew for organizing the *Sugar Cane* Symposium XXXVII in São Carlos in June. It was a wonderful conference and our first time in South America.

And finally thank you to Alexander Olevskii on whom we have relied as a Contributing Editor of the *Exchange* for more than fifteen years. The *Exchange* is distinctive among research journals in that the intellectual integrity of the journal resides with the Contributing Editors. It is they who assign referees and make final publication decisions. Sasha has served our community superbly well and we will miss his advice and high standard of professionalism.

**Welcome.** It is my pleasure to introduce you to Viktor Kolyada who will now serve the *Exchange* as a Contributing Editor for papers in harmonic analysis, Fourier series and inequalities. Welcome, Viktor!

**Author Class File.** Our raex.cls L<sup>A</sup>T<sub>E</sub>X classfile is used with every paper published in the *Exchange*. This classfile utilizes a format for entering author, title and other information that is particularly convenient for extracting that information for the various databases that list the *Exchange*. An author version of the raex.cls classfile is available at our website: [www.stolaf.edu/analysis](http://www.stolaf.edu/analysis).

**Advertisements.** Please note the advertisements at the end of each issue, which may be of interest to *Exchange* readers. Others promote Michigan State University Press publications and therefore help support the production of our journal. If you have written a book, or have an item of interest you wish to publicize in the Journal, please contact the Michigan State University Press Journals Division.

**Michigan State University Press.** If your are contemplating writing a textbook on a subject in mathematics, or a memoir, please consider using the Michigan State University Press as your publisher. The Press is a non-profit organization affiliated with Michigan State University that offers superior service and much lower costs than commercial publishers, along with complimentary advertising in *Real Analysis Exchange*.

**Website.** We encourage you to visit our website and invite your feedback regarding the content. The address is:
