

EDITORIAL MESSAGES

By Paul D. Humke

Post-Covid. The *Exchange* office and that of Michigan State University Press both anticipate a more normal work environment and schedule beginning in September. The *Two Days in Real Analysis* online conference organized by Emma Daniello was a great success and we look forward to *Summer Symposium XLVII* to be held June 20–24 jointly in Orsay and Paris.

Long Overdue! I'd like to offer a continuing and long overdue thanks to Lee Larson. Lee serves the *Exchange* as our go-to L^AT_EX expert, is the author of the ever evolving shell scripts that undergird our entire production operation, and serves as our main contact with Project Euclid. Lee's name does appear in every issue, but only in 12 point font; if font size were to reflect contribution it likely would be 48. 'Thought you'd like to know.

Thanks and Good Luck! Thanks also to Assistant Editor, Abigail (Abby) Halverson who manages the day-to-day operations of the Editorial Office and helps prepare papers for publication. Former Assistant Editors Thong Vo and Emily Olson have moved on. Emily is now a first year graduate student in mathematics at Rutgers, while Thong is working for the Bloomberg Corporation in Manhattan. Too, thanks always to Journals Manager Natalie Eidenier and her staff at Michigan State University Press who do final copy editing for the *Exchange* and shepherd each issue through the printing and distribution process.

JSTOR Access. Access to most of the back issues of the *Exchange* is now available on JSTOR. Access to the oldest volumes will take a bit longer as we await scanning and editing.

Author Class File. Our raex.cls L^AT_EX classfile is used with every paper published in the *Exchange*. This classfile utilizes a format for entering author, title, and other information that is particularly convenient for extracting that information for the various databases that list the *Exchange*. An author version of the raex.cls classfile is available at our website: www.stolaf.edu/analysis.

Michigan State University Press. If you are contemplating writing a textbook on a subject in mathematics, or a memoir, please consider using the Michigan State University Press as your publisher. The Press is a non-profit organization affiliated with Michigan State University that offers superior service and much lower costs than commercial publishers, along with complimentary advertising in *Real Analysis Exchange*.

Website. We encourage you to visit our websites and invite your feedback regarding the content. The addresses are:
