CONTENTS

EDITORIAL MESSAGES	i
CONFERENCE ANNOUNCEMENTS	iii
RESEARCH ARTICLES	
Édouard Daviaud An Upper Bound for the Hausdorff Dimension of Limsup Sets	259
David Manolis On the Problem of Integrating Infinite Derivatives	293
Amit Priyadarshi and Manuj Verma On the Decomposition of Functions as Sum and Product in Terms of Various Fractal Dimensions	299
Nayan Adhikary and Sudip Kumar Pal Quasi-Cauchy Sequences, the Functions that Preserve them, and a Weakening of Bourbaki Boundedness	315
Giuliano Basso Integral Representation of Functions on the Circle	345
Hajrudin Fejzić Continuity of Functions Relative to their Sets of Discontinuity	355
Bouharket Benaïssa and Mehmet Zeki Sarıkaya Milne-Type Inequalities for h -Convex Functions	363
T. J. Sullivan Hille's Theorem for Bochner Integrals of Functions with Values in Locally Convex Spaces	377
Nuno J. Alves and Giorgi G. Oniani Relation Between Asymptotic L_p -Convergence and Some Classical Modes of Convergence	389
INROADS	
Arthur A. Danielyan, Spyros Pasiás On Baire's First Class Functions and Blaschke Products	397
Oswaldo Rio Branco de Oliveira Changes of variable for the Riemann integral on the real line	401
