
CONTENTS

Dual modules and group actions on extra-special groups By I.M. ISAACS	505
Boundary value problems for semilinear elliptic equations of arbitrary order in unbounded domains By M. SCHECHTER	519
Local estimates that lead to weighted estimates for oscillating kernels in two dimensions By G. SAMPSON	535
Weighted inequalities for a vector-valued strong maximal function By O.N. CAPRI AND C.E. GUTIERREZ	565
A range for homogeneous, hyperbolic partial differential equations By C. HAMAKER	571
On weighted orlicz sequence spaces and their subspaces By F. FUENTES AND F.L. HERNANDEZ	585
Product complex submanifolds on of indefinite complex space forms By AT. IKAWA AND H. NAKAGAWA	601
Convergence in probabilistic semimetric spaces By G.D. RICHARDSON	617
Non-scattered zero-dimensional remainders By J. HATZENBUHLER AND D.A. MATTSON	635
Two theorems on inverse interpolation By A. L. HORWITZ AND L.A. RUBEL	645
The affine classification of cubic curves By D.A. WEINBERG	655
The topological classification of cubic curves By D.A. WEINBERG	665
Ergodic sequences and a subspace of $B(G)$ By P. MILNES AND A.L.T. PATTERSON	681
Linear combinations of hypernormal operators By J.B. CONWAY AND W. SZYMANSKI	695
A coefficient estimate for nonvanishing H functions By J.E. BROWN AND J.B. WALKER	707
