
CONTENTS

Utah State University Mathematics Conference	
By JERRY RIDENHOUR, RUSSELL THOMPSON AND LANCE L. LITTLEJOHN	415
Solid duel combustion—some mathematical problems	
By J.W. BEBERNES	417
Orthogonal polynomials and singular Sturm-Liouville Systems, I	
By LANCE L. LITTLEJOHN AND ALLAN M. KRALL	435
Boundary value problems with jumping nonlinearities	
By KLAUS SCHMITT	481
Sturm-liouville differential operators in direct sum spaces	
By W.N. EVERITT AND ANTON ZETTL	497
END OF CONFERENCE	
Indecomposable modules constructed from Liouville numbers	
By FRANK OKOH	517
Hyperbolic operators in spaces of generalized distributions	
By SALEH ABDULLAH	535
A limit on the length of the indecomposable modules over a hereditary algebra	
By BRIT ROHNES	543
Affine geometry and the form of the equation of a hypersurface	
By ROBERT C. REILLY	553
Asymptotic behavior of singular values of convolution operators	
By V. FABER AND G. MILTON WING	567
On the number of minimal prime ideals in the completion of a local domain	
By DANIEL KATZ	575
On neighborhoods of univalent convex functions	
By RICHARD FOURNIER	579
α -separation axioms and α -compactness in fuzzy topological spaces	
By A.S. MASHHOUR, M.H. GHANIM AND M.A. FAITH ALLA	591
The influence of the spectrum of the symmetrized fourth order operator on the geometry of a Riemannian manifold	
By GR. TSAGAS	601
