

THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 12

Fall 1982

Number 4

CONTENTS

On regular systems of linear differential equations with constant coefficients By JOHN W. HOOKER AND CARL E. LANCENHOP	591
On caratheodory conditions for functional differential equations with finite delays By GEORGE SEIFERT	615
A note on the solution sets of differential inclusions By C.J. HIMMELBERG AND F.S. VAN VLECK	621
Conjugate type boundary value problems for functional-differential equations By P.W. ELOE AND L.J. GRIMM	627
Nonoscillation results for second order nonlinear differential equations By LYNN H. ERBE AND JAMES S MULDOWNNEY	635
Nonuniform nonresonance conditions at the two first eigenvalues for periodic solutions of forced Lienard and Duffing equations By J. MAWHIN AND J.R. WARD	643
Boundary value problems for pairs of second order equations containing a small parameter By WALTER G. KELLEY	655
A coincidence theorem in convex sets with applications to periodic solutions of ordinary differential equations By R.E. GAINES AND JAIRO SANTANILLA M	669
Jacobian problems in differential equations and algebraic geometry By GARY H. MEISTERS	679
On existence of limit cycles in systems with discontinuous nonlinear terms By R.K. MILLER AND S.J. SKAR	707
Comparison techniques and the method of lines for a parabolic functional equations By J. BEBERNES AND R. ELY	723
A note on monotonicity properties of a free boundary problem for an ordinary differential equation By RUSSELL C. THOMPSON	735
