
CONTENTS

On the support of the Radon transform	
By STEPHEN ANDREA	193
Generalized Bazilevic functions	
By DOUGLAS M. CAMPBELL AND KENT PEARCE	197
On the fourier coefficeints and continuity of functions of class \mathcal{V}_Φ^*	
By ELLAINE COHEN	227
Differentiable points of the generalized Cantor function	
By THOMAS P. DENCE	239
Minimal uniform convergence spaces	
By D.C. KENT AND R.J. GAZIK	251
Torsion theore for not necessarily associative rings	
By W.G. LEAVITT AND R. WIENGANDT	259
Stepanoff flows on orientable surfaces	
By D. MARCHETTO	273
Shape fibrations, II	
By SIBE MARDESIC AND T. B. RUSHING	283
Cauchy transforms of measures, and a characterization of smooth peak interpolation sets for all the Ball algebra	
By ALEXANDER NAGEL	299
The G -transform of generalized functions	
By R.S. PATHAK AND J.N. PANDY	307
Infinite groups with a subnormality condition on infinite subgroups	
By VERIL L. PHILLIPS	327
$A(X)$ and GB -Noetherian rings	
By L.J. RATLIFF, JR.	337
Discontinuity of the alternating Chebyshev operator	
By ECKARD SCHMIDT AND C.B. DUNHAM	355
Arithmetic progressions in the values of a quadratic polynomial	
By BENNETT SETZER	361
A note on special classes of p -valent functions	
By E.M. SILVIA	365
A characterization of quaternion division algebras	
By KIRBY C. SMITH	371
Cantor sets in 3-manifolds	
By DAVID C. WRIGHT	377
