CONTENTS

Eigenvalue bifurcation for odd gradient operators By DAVID C. CLARK	317
A reduction of the continuous homomorphism problem for F -algebras equations By DENNIS CLAYTON	337
On the conjugating representation of a finite group By K.L. FIELDS	345
p -subgroups of core-free quasinormal subgroups II By FLETCHER GROSS	349
$1\frac{1}{2}$ and 2 generator ideals in Prüfer domains By R.C. HEITMANN AND L.S. LEVY	361
On the support of representing measures for harmonic functions By JOHN T. KEMPER	375
Tractions in critical point theory By DALE LANDIS AND MARSTON MORSE	379
Trees and Isols, Part I By T.G. MCLAUGHLIN	401
Almost periodic Dini theorems By GARY H. MEISTERS	419
Representation of ordered linear spaces By RICHARD C. METZLER	427
Homotopy-algebraic structures By F.D. WILLIAMS	445
Formally self-adjoint quasi-differential operators By A. ZETTL	453
