CONTENTS

An example concerning algebras of measurable functions By ANTHONY W. HAGER .....	415
Nodal domain theorems for general elliptic equations By KURT KREITH .....	419
A metric for weak convergence of distribution functions By DAVID A. SIBLEY .....	427
Spectral representation of selfadjoint dilations of symmetric operators with piecewise $C^2$ spectral functions By RICHARD C. GILBERT .....	431
Comparison theorems for second order delay differential equations By KLAUS SCHMITT .....	459
On Liapunov's direct method By JAMES S. MULDOWNNEY .....	469
Parallelism in near rings By GUNTER PILZ .....	483
Countably recognizable classes of groups By RICHARD E. PHILLIPS .....	489
Best Chebyshev quadratures By RICHARD FRANKE .....	499
Regularity theorems and Geršgorin theorems for matrices over rings with valuation By J.L. BRENNER .....	509
Curvature and characteristic classes of compact pseudo- Riemannian manifold By CHUAN-CHIH HSIUNG AND JOHN J. LEVKO III .....	523
The boundary of a vertically connected cube is tame By L.D. LOVELAND .....	537
$p$ -subgroups of core-free quasnormal subgroups By FLETCHER GROSS .....	541
Green's Lemma for groupoids By KENNETH M. KAPP .....	551
Some representation theorems By A. DE KORVIN AND R.J. EASTON .....	561
