CONTENTS

Biographical sketch – Leo Moser By MAX WYMAN .....	255
Embeddings of surfaces in $E^3$ By C.E. BURGESS AND J.W. CANNON .....	259
Sufficient conditions for a group to be a direct sum of cyclic groups By PAUL HILL .....	345
Divisible quotient groups of reduced Abelian groups By ELBERT A. WALKER .....	353
A necessary and sufficient condition for the oscillation of some linear second order differential equations By D. WILLETT .....	357
Decisive convergence spaces, Fréchet spaces and sequential spaces By D.C. KENT .....	367
The nilpotence class of core-free quasinormal subgroups By ROBERT H. BRADWAY, FLETCHER GROSS AND W.R. SCOTT .....	375
Generalized polar coordinate transformation for differential systems By WILLIAM T. REID .....	383
Primary cohomology operations in BSJ By ROBERT R. CLOUGH .....	407
