

VOLUME INDEX

- A, Selvakumar, see Ghanwat, Abhijeet.
- Al-Kateeb, Alaa, *On the middle coefficient of $\Phi_{3p_2p_3}$* , 1755.
- Albert, Michael with Jay Pantone and Vincent Vatter, *On the growth of merges and staircases of permutation classes*, 355.
- Alghamdi, A., see Elsayed, E.M..
- Alilooee, Ali with Selvi Kara Beyarslan and S. Selvaraja, *Regularity of powers of edge ideals of unicyclic graphs*, 699.
- Almalki, Yahya and Craig A. Nolder, *Spin structures and branch divisors on p -gonal Riemann surfaces*, 1769.
- Alp İlhan, Onur with Shakirbay G. Kasimov, Umrbek S. Madraximov and Haci M. Baskonus, *Solvability of the mixed problem of a high-order PDE with fractional time derivatives, Sturm-Liouville operators on spatial variables and non-local boundary conditions*, 1191.
- Anghel, N., *Identities for the zeros of entire functions of finite rank and spectral theory*, 1049.
- Azadi, H., see Khastan, A..
- Ball, Richard N. and Anthony W. Hager, *The inversion characterizations of $C(\mathcal{L})$ for a locale \mathcal{L}* , 2107.
- Bandura, Andriy and Oleh Skaskiv, *Functions analytic in the unit ball having bounded L -index in a direction*, 1063.
- Banjade, Debendra P., *Wolff's ideal theorem on Q_p spaces*, 2121.
- Barnette, Brandy with Warren Nichols and Tom Richmond, *The number of convex sets in a product of totally ordered sets*, 369.
- Baskonus, Haci M., see İlhan, Onur Alp.
- Belshoff, Richard with Daniel Kline and Mark W. Rogers, *Sets of lengths of powers of a variable*, 729.
- Berezansky, Leonid and Elena Braverman, *Explicit stability tests for linear neutral delay equations using infinite series*, 387.
- Beyarslan, Selvi Kara, see Alilooee, Ali.
- Beyki, M.R., see Srivastava, H.M..
- Blank, Ivan and Jeremy LeCrone, *Perturbed obstacle problems in Lipschitz domains: linear stability and nondegeneracy in measure*, 1407.
- Borgard, Riley, *Construction of σ^+ -game solutions on a rectangular grid*, 1793.
- Bourguiba, Rim and Faten Toumi, *Existence results for a semipositone singular fractional differential equation*, 2495.
