THE ROCKY MOUNTAIN
JOURNAL OF MATHEMATICS

Volume 4 Fall 1974 Number 4

CONTENTS

ω-semigroups
By C.H. Applebaum 597

Applications and proof of a uniqueness theorem for linear invariant families of finite order
By Douglas Michael Campbell 621

Uniqueness of solutions of an infinite system of equations
By Chin-Hung Ching and Charles K. Chui 635

Approximation induced by a fourier series
By Charles K. Chui 643

A formal number-termed system based on recursion
By Trevor J. McMinn 649

Erratum, Volume 3 673

Index, Volume 4 674
