

✠ Modern Logic Publishing ω

Announces a new book series

Modern Logic Books

Appearing late Winter 1992-93

Van Heijenoort: Logic and Its History in the Work and Writings of Jean van Heijenoort by Irving H. Anellis

— Price: \$39.95; March 1993

Pre-publication comments:

“A thorough and impressive job on van Heijenoort. I am much informed.”

— W.V. Quine (Harvard University)

“Anellis is certainly not only qualified for writing it but also a natural choice to do so.” — Michael Resnik (University of North Carolina)

Future Books Planned:

Charles Duffy, *Nikolai Lobachevsky: A Biography*

F.A. Medvedev, *Collected Papers on the History of Set Theory*
(translated from the Russian)

Bertrand Russell, *An Essay on the Foundations of Geometry*
(reprint edition)
