

CONTRIBUTIONS OF POLISH LOGICIANS
TO DECIDABILITY THEORY*

ROMAN MURAWSKI

Uniwersytet im. Adama Mickiewicza
Wydział Matematyki i Informatyki
ul. Matejki 48/49
60-769 Poznan, Poland

email: rmur@math.amu.edu.pl

Contents

1 Introduction

2 Decidability of theories

- 2.1 Effective quantifier elimination
- 2.2 Applications: decidability of particular theories

3 Undecidability of theories

- 3.1 General methods of proving undecidability
- 3.2 Applications: undecidability of particular theories

4 Reducibility results

5 New proofs of the incompleteness theorem

6 Conclusions

* Paper written in the framework of the research project, "Mathematical logic in Poland: origins, development, import," realized at the Jagiellonian University (Cracow) — Committee for Scientific Research (KBN) grant no. PB 1084/91. The upper bound of the period covered in the project was fixed as 1963.
