IMS LECTURE NOTES — MONOGRAPH SERIES

This series provides an avenue for the rapid, but carefully refereed, publication of important research results in comprehensive form and expository style. These volumes should be of great value to researchers and advanced students in statistics, probability, and related fields. The series editor is Shanti S. Gupta, Purdue University.

7 APPROXIMATE COMPUTATION OF EXPECTATIONS

by Charles Stein

An abstract approach to the approximate computation of expectations.

One aim of the theory of probability is the effective computation of probabilities that are given in principle. This volume presents an abstract approach to this issue keeping in mind the interaction of theoretical ideas and concrete problems.

8 ADAPTIVE STATISTICAL PROCEDURES AND RELATED TOPICS

edited by John Van Ryzin

Proceedings of the Symposium on Adaptive Statistical Procedures and Related Topics, Brookhaven National Laboratory, June 1985.

This symposium was held in honor of the 70th birthday of Herbert Robbins and covers the broad range of topics to which he has made fundamental contributions including stochastic approximation, empirical Bayes and sequential analysis. This volume contains 36 papers (five in abstract form) by students and/or colleagues of Robbins.

9 FUNDAMENTALS OF STATISTICAL EXPONENTIAL FAMILIES WITH APPLICATIONS IN STATISTICAL DECISION THEORY

by Lawrence D. Brown

A systematic treatment of the analytical and probabilistic properties of exponential families.

Many if not most of the successful mathematical formulations of statistical questions involve specific exponential families of distributions. This volume examines these mathematical formulations from the perspective of general exponential families with a variety of statistical applications in mind.

& ADDITIONAL TITLES

Previously published: Volume 1, *Essays on the Prediction Process* by Frank Knight ($15/members $9); Volume 2, *Survival Analysis* edited by John Crowley and Richard A. Johnson ($25/members $15); Volume 3, *Empirical Processes* by Peter Gaenssler ($20/members $12); Volume 4, *Zonal Polynominals* by Akimichi Takemura ($15/members $9); Volume 5, *Inequalities in Statistics and Probability* edited by Y. L. Tong ($25/members $15); Volume 6, *The Likelihood Principle* by James Berger and Robert Wolpert ($25/members $15). Forthcoming: *Differential Geometry in Statistical Inference* by S. Amari, O. Barndorff-Nielsen, R. Kass, S. Lauritzen, and C. R. Rao; *Group Theory in Statistics* by P. Diaconis.

Prepaid orders for individual volumes and requests for standing order enrollment (eligible for 20% prepublication discounts from list prices) should be sent to
