

CONTENTS

Mitsuo Hoshino: $DT\tau$ -invariant modules	205
Edoardo Ballico: Uniform vector bundles of rank $(n+1)$ on P_n	215
Yoshihiro Abe: Properties of an L -cardinal	227
Masaru Takeuchi: Killing tensor fields on spaces of constant curvature....	233
Katsuya Mashimo: Order of the standard isometric minimal immersions of CROSS as helical geometric immersions.....	257
Kumiko Nishioka: On a problem of Mahler for transcendency of function values II.....	265
Andrzej Nowicki: Derivations of special subrings of matrix rings and regular graphs	281
Hidenori Tanaka: Metrizable of Pixley-Roy hyperspaces	299
Takuo Miwa: Retraction of spaces with a σ -almost locally finite base	317
Zenji Kobayashi and Jun Morita: Automorphisms of certain root lattices ..	323
Hirokazu Iwashita: Spectral representations and asymptotic wave functions for long-range perturbations of the d'Alembert equation.....	337
Ryuji Kaneiwa: On the multiplicative partition function	355
Hiroshi Hosokawa: Aposyndesis and coherence of continua under refinable maps	367
