

CONTENTS

Tadashi Watanabe: Approximative shape, III—Fixed point theorems—	1
Mitsuru Sugimoto: Pseudo-differential operators on Besov spaces	43
Mitsuo Hoshino and Jun-ichi Miyachi: Tame two-point algebras	65
Mariko Yasugi: A two-storied universe of transfinite mechanisms	97
Masami Sekizawa: Natural transformations of vector fields on manifolds to vector fields on tangent bundles.	115
Yoshiyuki Watanabe: Unitary-symmetric Kahlerian manifolds and pointed Blashke manifolds	129
Yoshihiro Shibata: On the Neumann problem for some linear hyperbolic systems of second order	149
Kiyomasa Narita: Large deviation principle for diffusion processes	211
Tsunero Takahashi: Isometric immersion of Riemannian homogeneous manifolds	231
Hiroataka Kikyo: Remarks on Zil'ber's results: On the simplicity of the representation of groups and rings	235
Y.-F.S. Pétermann: Existence of all the asymptotic λ -th means for certain arithmetical convolutions	241
Jung-Hwan Kwon: Semi-invariant submanifolds of codimension 3 with harmonic curvature	249
U-Hang Ki: Cyclic-parallel real hypersurfaces of a complex space form ..	259
Fumiko Ohtsuka: On the existance of a straight line	269
