

**CONTENTS**

R. F. Lax: Normal higher weierstrass points .....	1
Yoshie Takeuchi: Factorization theorem for perfect maps between metrizable spaces.....	7
Shin-ichi Kasai: Universal transitivity of certain classes of reductive pre-homogeneous vector spaces .....	13
Wolfgang Müller and Werner Georg Nowak: On a mean-value theorem concerning differences of two $K$ -th powers.....	23
Ibrahim Assem, Jerzy Nehring and Andrzej Skowroński: Domestic trivial extensions of simply connected algebras .....	31
U-Hang Ki: Real hypersurfaces with parallel Ricci tensor of a complex space form .....	73
Yukinobu Yajima: The shrinking property of $\Sigma$ -products .....	83
Don Redmond: A generalization of a result of K. R. Johnson .....	99
Qing-ming Cheng and Yuen-da Wang: Complete Riemannian manifold minimally immersed in a unit sphere $S^{n+p}(1)$ .....	107
Hiroo Matsuda: On Lorentz manifolds with abundant isometries.....	113
Naoyuki Koike: Proper isoparametric semi-Riemannian submanifolds in a semi-Riemannian space form.....	131
Koji Nishida: On a construction of indecomposable modules and applications	147
Takao Matumoto: Equivariant CW complexes and shape theory.....	157
Kazuhiro Kawamura: Near-homeomorphisms on hereditarily indecomposable circle-like continua .....	165
Moto-o Takahashi: On the presentations of the fundamental groups of 3-manifolds .....	175
Yoshihiro Ohnita: Minimal surfaces with constant curvature and Kähler angle in complex space forms .....	191
Hideya Hashimoto: Hypersurfaces in the quaternions II .....	209
Nariyuki Minami: Exponential and super-exponential localizations for one-dimensional Schrödinger operators with Lévy noise potentials .....	225
