

CONTENTS

Yoshihiro Shibata: On the Neuman problem for some linear hyperbolic systems of 2nd order with coefficients in Sobolev spaces 283

Akira Masuoka: Corings and invertible bi-modules..... 353

Toyohiko Mukoyama: On the Cauchy problem for quasilinear hyperbolic-parabolic coupled systems in higher dimensional spaces 363

Hiroshi Mikawa: Almost-primes in arithmetic progressions and short intervals 387

G. Karpilovsky: The center of closed products over simple rings 403

Mitsuo Hoshino: Reflexive modules and rings with self-injective dimension two 419

Mitsuhiro Itoh: Yang-Mills connections and the index bundles 423

K.H. Kwon: Hypoellipticity of systems of pseudo differential operators with double characteristics..... 443

Mamoru Nunokawa: A note on multivalent functions 453

Enric Fossas: Killing vector fields on semiriemannian manifolds 457

Enric Fossas: Killing vector fields and the holonomy algebra in semi-riemannian manifolds 477

F.G. Lupiáñez and E. Outerelo: Paracompactness and closed subsets..... 483

Eriko Omachi: Some inequalities on $|\nabla R|$, $|\nabla Ric|$ and $|dr|$ in Riemannian manifolds 495

Kazuo Akutagawa: Compactness criteria for Riemannian manifolds with compact unstable minimal hypersurfaces 505

Kazuaki Taira: The theory of semigroups with weak singularity and its applications to partial differential equations 513
