

**CONTENTS**

Margaret Beattie: Strongly inner actions, coactions and duality theorems.. 279

J. Chabrowski: Existence results for quasilinear Dirichlet problem ..... 295

Aleksander Grytczuk: On Ramanujan sums on arithmetical semigroups .. 315

Qing-Ming Cheng and Bin Jiang: 3-dimensional submanifolds of spheres  
with parallel mean curvature vector ..... 321

Osamu Ikawa: On stability of a certain minimal submanifold in  $SU(3)/SO(3)$  335

Reiko Aiyama: On the Gauss map of complete space-like hypersurfaces  
of constant mean curvature in Minkowski space ..... 353

Qiang Zeng: On the vanishing of Hochschild cohomology  $H^1(A, A \otimes A)$  for  
a local algebra  $A$  ..... 363

Hiroshi Mikawa: On prime twins in arithmetic progressions ..... 377

Tomasz Dłotko: Fourth order semilinear parabolic equations ..... 389

Nobuyuki Kemoto and Yukinobu Yajima: Orthocompactness in products .. 407

Mamoru Nunokawa: A class of multivalent functions ..... 423

Bernd Günther: Properties of normal embeddings concerning strong shape  
theory, II ..... 429

Jun Morita: A combinatorial proof for Artin's presentation of the braid  
group  $B_n$  and some cyclic analogue ..... 439

Andrzej Chrzęszczyk: On some class of initial boundary value problems  
for second order quasilinear hyperbolic systems ..... 443

Yoshihiro Abe: Weakly normal filters and large cardinals..... 487

Kazuhiko Morishita: The minimal support for a continuous functional on  
a function space II ..... 495

Hidenori Tanaka: A class of spaces whose countable product with a per-  
fect paracompact space is paracompact..... 503

Hiroshi Mikawa: On the exceptional set in Goldbach's problem ..... 513

Jun-ichi Miyachi: Recollement and idempotent ideals ..... 545
