Harold R. Bennett, Masami Hosobuchi and Takuo Miwa: On embeddings of perfect GO-spaces into perfect LOTS 1

Roman Pol: On light mappings without perfect fibers on compacta 11

Eric Boeckx: New explicit examples of complete semi-symmetric hypersurfaces of hyperbolic type 21

Makoto Sakaki: On minimal surfaces with constant Kähler angle in CP^3 and CP^4 33

Sun Huafei: Pseudo-umbilical submanifolds of a space form $N^{n+p}(C)$ 45

Takeyuki Nagasawa and Atsushi Tachikawa: Existence and asymptotic behavior of weak solutions to semilinear hyperbolic systems with damping terms 51

Richard Marcuson: A note on the Tits systems of Kac-Moody Steinberg groups 65

Jun Morita: Meta-abelianizations of $SL(2, \mathbb{Z}[\frac{1}{p}])$ and Dennis-Stein symbols 71

Michikazu Sato: Some properties on tests based on the Bayesian confidence interval 77

Eduardo Cuchillo-Ibáñez and Juan Tarrés: Sum theorems for the strong small transfinite dimension 93

Shoji Kyuno and Stefan Veldsman: Representation of near-ring morita contexts and recognizing morita near-rings..... 107

Akira Koyama: A characterization of compacta which admit acyclic UV^{n-1} -resolutions 115

Toshimasa Kobayashi: $Sp(n)$ -equivariant harmonic maps between complex projective spaces 123

Radu Miron and Gheorghe Atanasiu: Geometrical theory of gravitational and electromagnetic fields in higher order Lagrange spaces 137

Takashi Oguro and Kouei Sekigawa: Almost Kähler structures on the Riemannian product of a 3-dimensional hyperbolic space and a real line 151

Masazumi Hanazawa: On a refinement of anti-Souslin tree property..... 163

Shiho Satoh: The moduli space of anti-self-dual connections over Hermitian surfaces..... 171

Koji Tojo: Totally geodesic submanifolds of naturally reductive homogeneous spaces 181

Masatoshi Kokubu: On minimal submanifolds in product manifolds with a certain Riemannian metric..... 191

Hirofumi Matsunaga: The stable topology of moduli spaces of periodic instantons..... 199

Kenichi Yamauchi: On isomorphisms of a Brauer character ring onto another 207

Hiroshi Fujita and Shinji Taniyama: On homogeneity of hyperspace of rationals 213

Tatsuyoshi Hamada: A characterization of pseudo-Einstein real hypersurfaces in a quaternionic projective space 219

Toshiaki Adachi: Curvature bound and trajectories for magnetic fields on a Hadamard surface..... 225

Satoshi Suzuki: Unimodularity of finite dimensional Hopf algebras..... 231

Paul E. Ehrlich, Yoon-Tae Jung and Seon-Bu Kim: Constant scalar curvatures on warped product manifolds 239
