|   |     |
|---|-----|
| Haruhisa Ishida: The Cauchy problem for weakly hyperbolic equations<br>of second order.....                             | 1   |
| Rafael López: Constant mean curvature surfaces with boundary .....  | 27  |
| Jhon Michael Rassias: Existence of weak solutions for a parabolic<br>elliptic-hyperbolic Tricomi problem .....          | 37  |
| Naonori Ishii: A certain graph obtained from a set of several points on<br>a Riemann surface .....                      | 55  |
| Wu Bingye: Conformally flat manifolds with positive Ricci curvature .....   | 91  |
| S. M. Agiev, D. Repovš and E. V. Ščepin: The extension problem for<br>complete $UV^n$ -preimages .....                  | 97  |
| Ryszard Deszcz and Marek Kucharski: On curvature properties of<br>certain generalized Robertson-Walker spacetimes ..... | 113 |
| Toshihiko Hoshiro: On the estimates for Helmholtz operator .....  | 131 |
| Eduardo García-Río and Lieven Vanhecke: Geodesic transformations<br>in almost Hermitian geometry .....                  | 151 |
| Eriko Omachi: A note on Kaehlerian metrics with certain property for<br>$\nabla\text{Ric}$ .....                        | 183 |
