

C O N T E N T S

Masayuki Saito, Takeshi Toshimitsu and Yoshihisa Uchida: A power series satisfying a certain functional equation	419
M. G. Charalambous: Constructing Approximate inverse systems of metric spaces	435
Zhou Jianwei: The upper bounds for eigenvalues of Dirac operators	447
Shigeaki Tsuyumine: On Shimura lifting of modular forms	465
U-Hang Ki and Joon-Sik Park: Affine inner automorphisms of $SU(2)$	485
Taras Banach: On hyperspaces and homeomorphism groups homeomorphic to products of absorbing sets and R^∞	495
Thomas Runst and Yavdat Il'yasov: On equations of the type $Au = g(x, u, Du)$ with degenerate and nonlinear boundary conditions	505
Byung Keun Sohn and Dae Hyeon Pakk: Wavelets in the generalized tempered distribution	529
Jie Lü, Jincheng Xiong and Xiangdong Ye: An equivalent condition for continuous maps of a class of continua to have zero topological entropy	539
Toshiyuki Ichiyama, Hitoshi Furuhashi and Hajime Urakawa: A Conformal gauge invariant functional for Weyl structures and the first variation formula	551
Tooru Sasahara: CR-submanifolds in complex hyperbolic spaces satisfying an equality of Chen	565
Satoshi Gomyo: Realizations of subgroups of type D_n of connected exceptional simple Lie groups of type E_n	585
