

**CONTENTS**

Soichi Ikeda, Isao Kiuchi and Kaneaki Matsuoka: The mean values of the double zeta-function .....	169
Hiroataka Kikyo and Masanori Sawa: Köhler theory for countable quadruple systems .....	189
Naotaka Shoji: On $T$ -coercive interior transmission eigenvalue problems on compact manifolds with smooth boundary .....	215
Yoshimi Kitamura and Yoshio Tanaka: Finitely generated semi-cones in product rings.....	235
Mamoru Nunokawa and Janusz Sokół: On multivalent functions in the unit disc.....	251
Peter Mrozik: Extending functors from the category of strict morphisms of inverse systems to the associated pro-category with applications to the first derived limit.....	265
Lung-Hui Chen: An inverse spectral uniqueness in exterior transmission problem .....	297
