

CONTENTS

Yuuki Tadokoro: The period matrix of the hyperelliptic curve $w^2 = z^{2g+1} - 1$	137
Ryunosuke Ozawa: Distance between metric measure spaces and distance matrix distributions	159
Makoto Kawashima: Evaluation of the dimension of the $\mathbf{Q}$ -vector space spanned by the special values of the Lerch function	171
Humio Ichimura: Refined version of Hasse's Satz 45 on class number parity	189
Takeshi Harui, Jiryo Komeda and Akira Ohbuchi: The Weierstrass semigroups on double covers of genus two curves	201
Setsuo Nagai: A characterization of isoparametric hypersurfaces in a sphere with $g \leq 3$	207
Kan Kaneko: A method for finding a minimal point of the lattice in cubic number fields (II)	227
Toshikazu Miyashita: Realizations of globally exceptional $\mathbf{Z}_2 \times \mathbf{Z}_2$ - symmetric spaces	239
H. Brunotte: Corrigendum to "Periodicity and eigenvalues of matrices over quasi-max-plus algebras"	313
