	Page
Tadashi ASHIKAGA: Toric modifications of cyclic orbifolds and an extended Zagier reciprocity for Dedekind sums	323
Marek T. MALINOWSKI: Set-valued and fuzzy stochastic differential equations in M-type 2 Banach spaces	349
Zhen GUO, Tongzhu LI and Changping WANG: Classification of hypersurfaces with constant Möbius Ricci curvature in \mathbb{R}^{n+1}	383
Pedro FREITAS and David KREJČIŘÍK: Alexandrov's isodiametric conjecture and the cut locus of a surface	405
Alberto MEDINA: Structure of symplectic Lie groups and momentum map	419
Yuzuru INAHAMA: Large deviation principle for certain spatially lifted Gaussian rough path	433
Yu FU: Biharmonic hypersurfaces with three distinct principal curvatures in Euclidean space	465
