|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Kazumi TSUKADA: The Gauss maps of transversally complex submanifolds of a quaternion projective space . . . . .                                                                        | 1    |
| Andrea LOI, Michela ZEDDA and Fabio ZUDDAS: Ricci flat Calabi's metric is not projectively induced . . . . .                                                                           | 29   |
| Bin CHEN and Lili ZHAO: Finsler conformal changes preserving the modified ricci curvature . . . . .                                                                                    | 39   |
| Kazuki AOKI: Global existence of small solutions for a quadratic nonlinear fourth-order Schrödinger equation in six space dimensions . . . . .                                         | 49   |
| John MACHACEK: Strong factorization and the braid arrangement fan . . . . .                                                                                                            | 99   |
| Keiichi KATO, Masaharu KOBAYASHI, Shingo ITO and Tadashi TAKAHASHI: Representation of higher-order dispersive operators via short-time Fourier transform and its application . . . . . | 105  |
| Toshihide FUTAMURA and Tetsu SHIMOMURA: The double obstacle problem for Musielak-Orlicz Dirichlet energy integral on metric measure spaces . . . . .                                   | 119  |
| Daniel CAVEY and Akihiro HIGASHITANI: Winding number of $r$ -modular sequences and applications to singularity content of a fano polygon . . . . .                                     | 137  |
