CONFERENCE ANNOUNCEMENTS

SUMMER SCHOOL ON REAL FUNCTIONS THEORY

WHEN: September 12-16, 1994
WHERE: Liptovský Ján (Slovakia)

The Mathematical Institute of the Slovak Academy of Sciences, Bratislava and Kosice, is organizing the traditional "Summer School on Real Functions Theory" (the latest was held in 1992 in Dubník, Nové Mesto, in memory of Prof. T. Neubrunn). Real functions theory (in particular generalized continuity, differentiability, integrability as well as applications) will be covered. There will be 3-4 invited lectures and 20 minute communications by participants.

The Conference will take place at the Hotel Stavoindustria in Liptovský Ján, September 12 (arrival day) – September 16, 1994. The village of Liptovský Ján (650 m above the sea level) is located within beautiful surroundings of the Low Tatra Mountains in north Slovakia near the town of Liptovský Mikuláš (12 km). It provides outstanding tourist conditions, swimming pool with thermal water and sauna and other attractions. The lodging in the Hotel Stavoindustria is comfortable and the place meets well the needs of a scientific meeting. The total cost of the conference (including accommodation, full board and the conference fee) will be approximately 100 USD. Papers (subjected to the usual refereeing procedure) will appear as a special volume of the Tatra Mountains Math. Publ., the official journal of the Mathematical Institute of the Slovak Academy of Sciences. You can submit a manuscript even if you do not intend to participate. The proposed time of submitting is the week of the conference, the deadline for the final version is October 15 at the latest. We plan that the conference volume will appear in 1995.
