# CONFERENCE ANNOUNCEMENTS

## The Eighteenth Symposium on Real Analysis

**WHEN:** June 22–26, 1993
**WHERE:** University of Virginia

The objective of this meeting is to promote genuine interchange of ideas across the boundaries of age and country. There will be five one hour lectures to be given by

| | |
|---|---|
| Gerald Edgar | (Ohio State) |
| Daniel Mauldin | (North Texas) |
| Yuval Peres | (Jerusalem and Stanford) |
| Jacques Peyriere | (Paris) |
| Loren Pitt | (Charlottesville) |

There will be an opportunity for a limited number of 20 minute presentations by participants but substantial blocks of time will be allocated for the structured discussion of current research problems. Some funding may be available to enable recent Ph.D.'s to attend. Participants may reserve accommodation in a Residence Hall or in a nearby motel. There is an airport in Charlottesville served by four airlines, but participants may prefer to fly to Washington, D.C. and rent a car from there (2 hours). Several tourist attractions are accessible from Charlottesville in addition to the famous University of Virginia "grounds" designed by Thomas Jefferson.

# International Conference "Problems in Real Analysis"

**WHEN:** July 11-13, 1994
**WHERE:** University of Łódź (Poland)

The aim of the conference is a presentation of the latest trends in the contemporary real analysis, including topological and set-theoretical methods, and studies concerning various versions of generalized continuity, the derivative and the Darboux property. There will be 3–4 longer lectures (50 minutes) and 20–25 communications (20 minutes). Among the potential participants the following are expected to come: K. Ciesielski, M. Evans, C. Freiling, P. D. Humke, R. A. Johnson, L. Larson, T. Nishiura, R. O'Malley, C. Weil (U.S.), B. Thomson (Canada), M. Laczkovich, G. Petruska (Hungary), L. Bukovsky, B. Kirchheim, M. Repicky, J. Smital, P. Vojtas (Slovakia), A. Olevskii (Russia), B. Bongiorno (Italy), L. Zajicek (Czechia), and several mathematicians from Poland (Łódź, Gdańsk, Bydgoszcz, Wrocław).

Participants will stay in a university hotel (for about 50 persons, with single and double rooms) in a nice part of the town. The hotel has a conference room; meals will be also served there. It is possible to extend the stay for a few days following the conference. As a follow-up of the conference, Joint U.S.–Polish Workshops in Real Analysis are planned (18-21 July) in the same place. Professor K. Ciesielski from the West Virginia University is one of the main organizers of the Workshops.

For further information, please contact:

> Władysław Wilczyński, Conference Director
> Marek Balcerzak, Jacek Hejduk, Conference Secretaries
> e-mail: mbalce@plunlo51.bitnet

> Institute of Mathematics, University of Łódź,
> ul. S. Banacha 22, 90-239 Łódź, Poland

Added in proof. At this moment (the beginning of November'93) the conference should be treated "almost surely" as next years budget for Łódź University won't be finalized until early spring, 1994.

Those participants who were able to return from lunch by the appointed hour are pictured above.

Above we have a photo of the four princlple speakers at the conference. The picture was taken at the banquet.

After awarding five mini Andies (innovative!) the conference coordinator, Karen Saxe, presented the main **ANDY** to this year's lucky(?) winner, Professor **DANIEL WATERMAN**. She claims the heavey rain storm that preceded Professor Waterman's talk had no influence on her decision to aware him the prize.

Participant Professor Casper Goffman (pictured here with his wife, Eve) celebrated his 80th birthday close enough to the date of the banquet to warrant a party.
