## BANACH ALGEBRA RELATED TO THE JACOBI POLYNOMIALS

(This journal, Vo1. 21, pp. 668-673)<br>Satoru Igari and Yoshikazu Uno

(Received March 2, 1970)

The inequality $1-x_{n}<2^{-2 n}$ in the last line on p .671 should be replaced by $4\left(1-x_{n+1}\right)<1-x_{n}$. The last term in the line 7 on p. 672 must be $O\left(m^{2} 4^{-n+k}\left(1-x_{k+1}\right)\right)$, where $k$ is chosen so that $1-x_{k+1}<m^{-2} \leqq 1-x_{k}$. The three sums in the followings run from $k+1$ to $N$ and 1 to $k$ respectively. The sum in the line 12 on the same page should be omitted but the estimation $O(1)$ holds good.
