CONTENTS

Ako, M., *See* Yano, K. & Ako, M. 341
Bierstone, E., *The equivariant covering homotopy property for differentiable G-fibre bundles* 615
Bowman, R. H., *Second order connections.* II 75
Brender, A., *Stable complex structures on real manifolds* 579
Brühlmann, H., *A congruence theorem for closed hypersurfaces in Riemann spaces* 479
Cenkl, B., *Zeros of vector fields and characteristic numbers* 25
Chavel, I., *Geodesics and volumes in real projective spaces* 359
Cheeger, J., *Some examples of manifolds of nonnegative curvature* 623
Chen, B. Y. & Yano, K., *Umbilical submanifolds with respect to a nonparallel normal direction* 589
Eberlein, P., *When is a geodesic flow of Anosov type?* I 437
———, *When is a geodesic flow of Anosov type?* II 565
Flanders, H., *An integral formula* 331
Goldberg, S. I., *The axiom of 2-spheres in Kaehler geometry* 177
Grove, K., *Conditions (C) for the energy integral on certain path spaces and applications to the theory of geodesics* 207
Gulliver, R. D., II, *The Plateau problem for surfaces of prescribed mean curvature in a Riemannian manifold* 317
Hermann, R., *Formal linearization of vector fields and related cohomology.* I 1
———, *Formal linearization of vector fields and related cohomology.* II 15
Hoffman, D. A., *Sulfaces of constant mean curvature in manifolds of constant curvature* 161
Holzsager, R., *A characterization of Riemannian manifolds of constant curvature* 103
Hong, S. L., *Isometric immersions of manifolds with plane geodesics into Euclidean space* 259
Ishihara, S. & Ki, U. H., *Complete Riemannian manifolds with* (f, g, u, v, λ)*-structure* 541
Itoh, T. & Ogiue, K., *Isotropic immersions* 305
Jensen, G. R., *Einstein metrics on principal fibre bundles* 599
Ki, U. H., *See* Ishihara, S. & Ki, U. H. 541
Koch, P. O., *On the product of Schubert classes* 349
Kowalski, O., *Partial curvature structures and conformal geometry of submanifolds* 53
Kulkarni, R. S., *Congruence of hypersurfaces* 95
Leicher, H., *Natural operations on covariant tensor fields* 117
Lelong-Ferrand, J., *Invariants conformes globaux sur les variétés Riemanniennes* 487

Leung, D. S. P., *The refection principle for minimal submanifolds of Riemannian symmetric spaces* 153
Libermann, P., *Parallélisms* 511
Lynge, W. C., *Ideal decompositions of Killing and holomorphic vector fields* 249
Mazet, E., *La formule de la variation seconde de l'énergie au voisinage d'une application harmonique* 279
Nomizu, K., *Conditions for constancy of the holomorphic sectional curvature* 335
Ogiue, K., *See* Itoh, T. & Ogiue, K. 305
Okumura, M., *Hypersurfaces of $S^{2n+1}(k)$ in E^{2n+2}* 107
Reilly, R. C., *Variational properties of functions of the mean curvature for hypersurfaces in space forms* 465
Spruck, J., *On the radius of the smallest ball containing a compact manifold of positive curvature* 257
Stehney, A., *Courbure d'ordre p et les classes de Pontrijagin* 125
———, *Extremal sets of p-th sectional curvature* 383
Sundararaman, D., *Normal filtration of $H^1(M, \theta)$* 225
Tachibana, S. I., *The mean curvature for p-plane* 47
Tanno, S., *Compact conformally flat Riemannian manifolds* 71
———, *Compact complex submanifolds immersed in complex projective spaces* 629
Toledo, D., *On the Atiyah-Bott formula for isolated fixed points* 401
Uhlenbeck, K., *The Morse theorem in Hilbert space* 555
Vidal, E. & Vidal-Costa, E., *Special connections and almost foliated metrics* 297
Vidal-Costa, E., *See* Vidal, E. & Vidal-Costa, E. 297
Watson, B., *Manifold maps commuting with the Laplacian* 85
Wells, J. C., *Differentiable functions on Banach spaces with Lipschitz derivatives* 135
Yano, K., *Differential geometry of $S^n \times S^n$* 181
Yano, K. & Ako, M., *An affine connection in an almost quaternion manifold* 341
Yano, K., *See* Chen, B. Y. & Yano, K. 591
Yau, S. T., *Remarks on conformal transformations* 369
