

ANNALES DE L'INSTITUT HENRI POINCARÉ PROBABILITÉS ET STATISTIQUES

The right tail exponent of the Tracy–Widom β distribution

L. Dumaz and B. Virág 915–933

Perturbed Toeplitz operators and radial determinantal

processes *T. Ehrhardt and B. Rider* 934–960

The generalized weighted probability measure on the symmetric group and the asymptotic behavior of the cycles

A. Nikeghbali and D. Zeindler 961–981

Lévy processes conditioned on having a large height

process *M. Richard* 982–1013

A remarkable σ -finite measure unifying supremum penalisations

for a stable Lévy process *Y. Yano* 1014–1032

Weakly nonlinear stochastic CGL equations

..... *S. B. Kuksin* 1033–1056

Stochastic differential equations with Sobolev drifts and driven

by α -stable processes *X. Zhang* 1057–1079

On random fractals with infinite branching: Definition,

measurability, dimensions *A. Berlinkov* 1080–1089

Transitions on a noncompact Cantor set and random walks on its

defining tree *J. Kigami* 1090–1129

Size of the giant component in a random geometric

graph *G. Ganesan* 1130–1140

Perturbing the hexagonal circle packing: A percolation

perspective *I. Benjamini and A. Stauffer* 1141–1157

Limit theorems for geometric functionals of Gibbs point

processes *T. Schreiber and J. E. Yukich* 1158–1182

Constructive quantization: Approximation by empirical

measures *S. Dereich, M. Scheutzow and R. Schottstedt* 1183–1203

Nonparametric estimation of the jump rate for

non-homogeneous marked renewal processes

R. Azaïs, F. Dufour and A. Gégout-Petit 1204–1231
