

# JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 67

March 1972

Number 337

## Applications

- On the Question of Statistical Confidentiality . . . . . I. P. Fellegi  
 A Cost-Effectiveness Model for Air Pollution Control with a Single Stochastic Variable . . . Robert E. Kohn  
 Time and Frequency Domain Representations of Futures Prices as a Stochastic Process  
 . . . . . Thomas F. Cargill and Gordon C. Rausser  
 Using Regression Models to Estimate the Expectation of Life for the U.S.S.R. . . . . D. Peter Mazur  
 Seasonal Adjustment of Economic Data by the General Linear Statistical Model  
 . . . . . James A. Stephenson and Helen T. Farr

- Verification Error in Single Sampling Inspection Plans for Processing Survey Data . . . . . George Minton  
 Convergence Pattern of the Scoring Method in Estimating Parameters of a Lognormal Function . . . C. Michelini  
 Analysis of Contingency Tables Having Ordered Response Categories . . . O. Dale Williams and James E. Grizzle  
 Approximate Distribution of Parameters in a Distributed Lag Model  
 . . . . . Theodore P. Lianos and Gordon C. Rausser

- Upper Bounds for Correlations Between Binary Outcomes and Probabilistic Predictions  
 . . . . . Donald G. Morrison

- A Monte Carlo Study of Analysis of Variance and Competing Rank Tests for Scheffé's Mixed Model  
 . . . . . Richard O. Gilbert  
 Some Recent Results in Lognormal Parameter Estimation Using Grouped and Ungrouped Data  
 . . . . . Brian O'Neill and W. T. Wells

## Invited Paper

- Research and Theory on the Learning of Probabilities . . . . . William K. Estes

## Theory and Methods

- Recent Developments in the Design of Factorial Experiments . . . . . Sidney Addelman  
 Estimation of Variance and Covariance Components in Linear Models . . . . . C. Radhakrishna Rao  
 Sample-Based Classification Procedures Derived from Density Estimators . . . . . Ned Glick  
 Direct Clustering of a Data Matrix . . . . . J. A. Hartigan  
 Limiting the Risk of Bayes and Empirical Bayes Estimators—Part II: The Empirical Bayes Case  
 . . . . . Bradley Efron and Carl Morris  
 The Isotonic Regression Problem and Its Dual . . . . . R. E. Barlow and H. D. Brunk  
 An Inverse Stopping Rule for Play-the-Winner Sampling . . . . . David G. Hoel  
 A Comparison of Lag Window Generators . . . . . Henry R. Neave  
 The Exact Finite-Sample Distribution of the Limited-Information Maximum Likelihood Estimator in the  
 Case of Two Included Endogenous Variables . . . . . Roberto S. Mariano and Takamitsu Sawa  
 The Role of Approximate Prior Restrictions in Distributed Lag Estimation . . . . . Christopher A. Sims  
 Some Finite Sample Results for Theil's Mixed Regression Estimator  
 . . . . . T. A. Yancey, M. E. Bock and G. G. Judge

- A Monte Carlo Study of Some Small Sample Properties of Tests for Specification Error  
 . . . . . J. Ramsey and R. Gilbert  
 A Decision-Theoretic Approach to Interval Estimation . . . . . Robert L. Winkler  
 Estimators of Severity Factors in a Multiplicative Poisson Model . . . . . S. Zacks and W. J. Zimmer  
 Distribution-Free Interval Estimation of the Largest  $\delta$ -Quantile . . . . . M. Haseeb Rizvi and K. M. Lal Sazena  
 Asymptotic Efficiencies of Quick Methods of Computing Efficient Estimates Based on Ranks  
 . . . . . Charles H. Kraft and Constance van Eeden

- Comparisons Among Estimators of a Scale Parameter of the Beta-Stacy Distribution  
 . . . . . N. L. Johnson and S. Kotz  
 The Moments of a Distribution After Repeated Selection with Error . . . . . J. C. Young  
 Singular Weighing Designs and a Reflexive Generalized Inverse . . . . . K. S. Banerjee  
 The Best Test of Exponentiality Against Gamma Alternatives . . . . . Galen R. Shorack  
 An Approximate Analysis of Variance Test for Normality . . . . . S. S. Shapiro and R. S. Francia  
 The Theory of Equitable Quality Level and Error-Areas Under the OC Curves of Acceptance Sampling Plans  
 . . . . . M. T. Subrahmanya

- An Alternative for the Linear Regression Equation when the Predictor Variable Is Uncontrolled and the  
 Sample Size Is Small . . . . . Nathan King  
 Approximate Confidence Limits for System Reliability . . . . . Robert G. Easterling  
 On the Comparison of Two Methods of Combining Independent Tests . . . Ramon C. Littell and J. Leroy Folks  
 Stratified Sample Surveys with Multiplicity . . . . . Monroe G. Sirken  
 Series Representations of a Bivariate Single Noncentral  $t$  Distribution . . . . . Marakatha Krishnan  
 Recurrence Relation for the Minimum Variance Unbiased Estimator of Parameter of a Left-Truncated Poisson  
 Distribution . . . . . J. C. Ahuja and E. A. Enneking  
 Disturbance-Variance Estimation in Simultaneous Equations When Disturbances Are Small  
 . . . . . V. K. Srivastava

## BOOK REVIEWS

*For further information, please contact:*

**AMERICAN STATISTICAL ASSOCIATION**

806 15th Street, N.W.

Washington, D. C. 20005

## SANKHYĀ

### *The Indian Journal of Statistics*

EDITORS: P. C. MAHALANOBIS, C. R. RAO

CONTENTS OF SERIES B, VOLUME 33, PARTS 3 and 4, 1971

On Multivariate Contagious Distributions .....	C. G. Khatri
An Empirical Bayes Estimator for [success] in the Binomial Distribution .....	Barry S. Griffin and Richard G. Klotz
Relationship Algebra of an Incomplete Diallel Cross .....	C. A. McGilchrist
Table of the Poisson Log Normal Distribution .....	Susannah Brown and P. Holgate
Genetic Correlations in Equilibrium Population .....	Ranajit Chakraborty
Statistical Analysis of Bilateral Symmetry in Plant Organs .....	T. Arora, D. S. Chandra and C. R. Ramanujacharyulu
Left- and Right-Handedness of Plant Organs: Is It Determined by a Bernoulli Process? (Discussion of the Paper by Davis and Ramanujacharyulu) .....	Sujit Kumar Mitra
An Application of Analysis of Variance Technique to Monte Carlo Data of Human Reproduction .....	T. K. Roy and K. Venkatacharya
A Stochastic Model for the Study of Open Birth Interval—A Cohort Approach .....	K. B. Pathak
On Some Probability Distributions for Couple Fertility .....	S. N. Singh and B. N. Bhattacharya
A Note on Mukerji's Model of the Distribution of First Births .....	M. L. Srivastava and Rudranand Prasad
Projection Models Using Population Distribution by Size-Classes of Residence .....	S. Mitra
On the Existence and Uniqueness of a New Class on Index Numbers .....	D. S. Prasada Rao
On Rural-Urban Differentials in Consumer Prices and Per Capita Household Consumption in India by Levels of Living .....	N. Bhattacharya and G. S. Chatterjee
Structure of Indian Economy: 1964-65 Input-Output Relations Among 144 Sectors .....	M. R. Saluja
Successive Sampling with Two Auxiliary Variables .....	A. R. Sen
Estimation of the X Intercept of the Point of Intersection of a Family of Lines Concurrent on the X Axis .....	D. A. Sprott and R. G. Stanton
An Inequality for the Variance of a Discrete Random Variable .....	J. J. A. Moors and J. Mulwijck
Orders for the Journal for distribution outside India are to be sent to:	
Pergamon Press Ltd.,	Pergamon Press Inc.,
Headington Hill Hall, or	122 East 57th Street,
Oxford, England	New York 22, USA
Orders for the Journal for distribution within India are to be sent to:	
Statistical Publishing Society,	
204/1 Barrackpore Trunk Road,	
Calcutta-35, India	

## SANKHYĀ

### *The Indian Journal of Statistics*

EDITORS: P. C. MAHALANOBIS, C. R. RAO

CONTENTS OF SERIES A, VOLUME 33, PART 4, 1971

A Unified Theory of Linear Estimation .....	C. Radhakrishna Rao
Generalised Inverses of Partitioned Matrices and Recalculation of Least Squares Estimates for Data or Model Changes .....	Sujit Kumar Mitra and P. Bhimasankaram
A Characterisation of Moore-Penrose Inverse and Related Results .....	Sujit Kumar Mitra and P. Bhimasankaram
Simultaneous Reduction of Several Hermitian Forms .....	P. Bhimasankaram
Experimental Designs and Combinatorial Systems Associated with Latin Squares and Sets of Mutually Orthogonal Latin Squares .....	A. Hedayat and S. S. Shrikhande
Covering Problems and a Family of Symmetric PBIBD's .....	J. F. Lawless and R. G. Stanton
Derivation of Normalizing Transformations with an Error or Order $1/n$ .....	Rudolf Borges
A Sequential Sample Spacings Test of the Two Sample Problem .....	Saul Blumenthal and Richard L. Greenstreet
Nonsingularity of the Sample Covariance Matrix .....	Somesh Das Gupta
A Cascade Process .....	Howard Weiner
Book Review	
Abstracts of Technical Reports	
Editorial Collaboration	
Publications Received	

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd., Pergamon Press Inc.,  
Headington Hill Hall, or 122 East 57th Street,  
Oxford, England New York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,  
204/1 Barrackpore Trunk Road,  
Calcutta-35, India

# BIOMETRICS

## Journal of the Biometric Society

### CONTENTS

Vol. 28, No. 2

June 1972

The Biometric Society: the first twenty-five years (1947-1972) .....	Gertrude M. Coz
Qualitative consequences of randomness in a linear kinetic system .....	P. E. Bergner and J. R. Gradijan
The apparent 'lag phase' in a stochastic population model in which there is no variation in the conditions of growth .....	W. A. O'N. Waugh
The logic of capture-recapture estimates .....	R. M. Cormack
Estimation of density of mourning doves from aural information .....	C. E. Gates and W. B. Smith
The canonical analysis of multiple species hybridization .....	P. E. Smouse
Dynamics of finite populations. I. The expected time to fixation or loss and the probability of an allele in a haploid population of variable size .....	R. D. Cook and R. F. Nassar
Some effects of two types of migration on the survival of a gene .....	E. Pollak
Variance of heritability ratios .....	I. L. Gordon, D. E. Byth, and L. N. Balaam
On a vector-valued birth and death process .....	D. N. Shanbhag
Zur Klassifizierung mehrdimensionaler Kontingenztafeln .....	N. Victor
Minimum discrimination information, the 'no interaction' problem, and the logistic function .....	J. Berkson
A parametrization of the logistic function which admits uncorrelated maximum likelihood estimators .....	R. A. Patton and G. F. Krause
A representation of mortality data by competing risks .....	D. G. Hoel
Bias in observable cancer age and life-time of mice subject to spontaneous mammary carcinomas .....	J. E. Faulkner and R. B. McHugh
The allocation of resources in population screening: a decision theory model .....	H. Goldstein
The comparison of several dose levels with a zero dose control .....	D. A. Williams
A robust test for linear regression .....	J. I. Thornby
Ranked set sampling theory with order statistics background .....	T. R. Dell and J. L. Clutter
Reliability of measurements for studies of cerebrovascular atherosclerosis .....	Ruth B. Loewenson, J. E. Bearman, and J. A. Resch
<b>QUERIES</b>	
Double sampling and the null hypothesis .....	N. Mantel
Non-additivity in two-way classifications with missing values .....	D. A. Preece
<b>NOTES</b>	
The use of non-parametric methods in the statistical analysis of the two-period change-over design .....	G. G. Koch
A new incomplete block design for slope-ratio assays .....	A. C. Kulshreshtha
A test for the homogeneity of variances among correlated variables .....	S. C. Choi and E. Wette
On the bias and estimated variance of Chapman's two-sample capture-recapture population estimate .....	Janet T. Wittes
Gamma time-dependency in Blaxter's compartmental model .....	J. H. Mattis
The analysis of non-independent $2 \times 2$ tables from $2 \times C$ tables using rank sums .....	M. N. Brunden
Measures for clinicians' disagreements over signs .....	B. M. Bennett
Analysis of diallel crosses between two groups where parental lines are included .....	C. S. Lin
The likelihood for multinomial proportions under stereographic projection .....	E. A. Thompson
Buffon's problem for non-random distributions .....	F. H. C. Marriott
<b>CORRECTION NOTE</b>	
Lengths and diameters of plant roots in non-random populations by analysis of plant surfaces: a correction .....	A. R. G. Lang

*Biometrics* is published quarterly. Its objects are to describe and exemplify the use of mathematical and statistical methods in biological and related sciences in a form assimilable by experimenters. Inquiries should be addressed to: Biometrics Business Office, Department of Experimental Statistics, North Carolina State University, Raleigh, North Carolina 27607.

# ESTADÍSTICA

Journal of the Inter-American Statistical Institute

Vol. XXVII, No. 104

CONTENTS

September 1969

- Notes on Family Income Distribution in Developing Countries in Relation to Population and Economic Changes ..... A. J. Jaffe
- Selection Procedures: An Introduction for Practitioners. .... Edward J. Dudewicz
- Delimitación de Areas Urbanas ..... Instituto de Planeamiento Urbano y Regional de la Facultad de Arquitectura y Urbanismo, Universidad de Buenos Aires
- A Small Econometric Model of Colombia ..... Lester D. Taylor
- Algunos Problemas que Dificultan el Desenvolvimiento de las Estadísticas Agropecuarias en los Países en Desarrollo ..... S. Mazumdar
- Legal Provisions. Institute Affairs. Statistical News. Publications.

*Published quarterly*      *Annual subscription price \$3.00 (U.S.)*

INTER-AMERICAN STATISTICAL INSTITUTE

Pan American Union

Washington, D. C. 20006

## TECHNOMETRICS

*A Journal of Statistics  
for the Physical, Chemical and Engineering Sciences*

CONTENTS

TECHNOMETRICS, Vol. 14, No. 2, MAY 1972

- Linear Estimation of A Regression Relationship From Censored Data Part I—Simple Methods and Their Application—Invited Paper No. 1 ..... Wayne Nelson and Gerald J. Hahn
- Discussion of Invited Paper No. 1 ..... Marvin Zelen
- The Inverse Autocorrelations of A Time Series and Their Applications—Invited Paper No. 2 ..... William S. Cleveland
- Discussion of Invited Paper No. 2 ..... Emanuel Parzen
- Optimum Incomplete Multinomial Samples ..... R. R. Hocking and W. B. Smith
- Three Probabilities of Misclassification ..... M. Sorum
- Calculation of the Residual Sum of Squares for all Possible Regressions ..... J. A. Morgan and J. F. Tatar
- The Use of An F-Statistic in Stepwise Regression Procedures ..... J. T. Webster and P. T. Pope
- Designs for Estimating the Slope of A Second Order Linear Model ..... Lyman Ott and W. Mendenhall
- An Analysis of Variance Test for the Exponential Distribution (Complete Samples) ..... S. S. Shapiro and M. B. Wilk
- Confidence Intervals for the Exponential Scale Parameter Using Optimally Selected Order Statistics ..... Kenneth S. Kaminsky
- A Simple Approximation to the Negative Binomial (and Regular Binomial) ..... William C. Guenther
- (Y vs. X) or (log Y vs. X)? ..... S. L. Schlove
- On Double-Stage Estimation in Simple Linear Regression Using Prior Knowledge ..... H. A. Al-Bayyati and J. C. Arnold
- Asymptotic Results for Discriminant Analysis When the Initial Samples are Misclassified ..... G. J. McLachlan
- Optimal Allocation of Observations When Comparing Several Treatments with A Control, II: 2-Sided Comparisons ..... Robert Bechhofer and D. Jean-Marie Nocturne
- Design of Over-Stress Life-Test Experiments When Failure Times Have the Two-Parameter Weibull Distributions ..... Nancy R. Mann
- A Bayesian Sequential Life Test ..... V. D. Barnett
- Rejecting Outliers in Factorial Designs ..... Wilhelmine Stefansky
- An Application of Stochastic and Dynamic Models for the Control of A Papermaking Process ..... S. M. Wu and L. H. Tee
- NOTE
- On A Characterization by Conditional Expectations ..... M. A. Hamdan
- BOOK REVIEWS
- LETTERS TO THE EDITOR
- NOTICES

The purpose of **TECHNOMETRICS** is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact **TECHNOMETRICS** Post Office Box 587 Benjamin Franklin Station Washington, D. C. 20004.

# THE ANNALS OF MATHEMATICAL STATISTICS

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of the *Annals of Mathematical Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with two additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

**Submission of Reference Papers.** Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title and Abbreviated Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law", depending on the emphasis to be conveyed.

**Abstract.** Each manuscript is required to contain an abstract, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of an abstract will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Abstract", followed by the title of the paper. Formulas should be used as sparingly as possible. The abstract should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes.** Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

**Key Words.** Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1970 subject classification. Primary—; Secondary—.

Key words and phrases:

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use, as an Appendix to *Mathematical Reviews* Index to Volume 39, June 1970. (See, also, *The Notices of the American Mathematical Society*, June 1970, pp. 616–618, for more details.) The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

**List of Symbols.** A completely typewritten list of symbols, identified typographically, not mathematically, should be attached to the manuscript on a separate page. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay", etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions in the text are preferably written with the solidus or negative exponent; thus,  $(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and  $(2\pi)^{-1}$  or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are pre-

ferred to  $a^{bc}$  and  $a_{bc}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

- [5] Wilks, S. S. (1938). The large-sample distribution of the likelihood ratio for testing composite hypotheses. *Ann. Math. Statist.* 9 60–62.

In textual material, the format "... Wilks (1938) ..." is normally preferred to "... Wilks [5] ...". Multiple references can be distinguished as "... Wilks (1938a) ...". Abbreviations for journals should be taken from *Mathematical Reviews* Index to Volume 40, 1970, pp. 1683–1702.

**Proofs.** Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Mathematical Statistics*. (For current address, see the latest issue of the *Annals*.)

## ***Contents (Continued)***

Limit theorems for Markov transition functions.....	RICHARD ISAAC	621
Extreme values in the GI/G/1 queue.....	DONALD L. IGLEHART	627
Discrete dynamic programming with unbounded rewards.....	J. MICHAEL HARRISON	636

### **Short Communications**

Choosing a point from the surface of a sphere.....	GEORGE MARSAGLIA	645
A note on sufficiency and invariance.....	ROBERT H. BERK	647
Relationships among some concepts of bivariate dependence.....	J. D. ESARY AND F. PROSCHAN	651
Sensitivity of raked contingency table totals to changes in problem conditions.....	B. D. CAUSEY	656
Notes on the covariance matrix of a random nested ANOVA model.....	LYNN ROY LAMOTTE	659
Note on a "Kolmogorov-type" inequality.....	VÁCLAV FABIAN	663
Boundary crossing probabilities for the Kolmogorov-Smirnov statistics.....	RICHARD M. STANLEY	664
Expansions for the density of the absolute value of a strictly stable vector.....	BERT FRISTEDT	669
A note on infinitely divisible random vectors.....	MOSHE POLLAK	673
A note on Poisson-subordination.....	JOSEF L. TEUGELS	676
Domains of attraction of first passage times.....	D. H. ROOT	681
A note on metric transitivity for stationary Gaussian processes on groups.....	BENNETT EISENBERG	683
Uniform integrability of square integrable martingales.....	DEAN ISAACSON	688
Hausdorff dimension in a process with stable components—an interesting counter-example.....	W. J. HENDRICKS	690

### **Notes**

Correction to "On obtaining large-sample tests from asymptotically normal estimators".....	T. W. F. STROUD	695
--	-----------------	-----

### **Addendum**

Addendum to "Local theorems in strengthened form for lattice random variables".....	J. DAVID MASON	696
---	----------------	-----

### **Book Review**

Review of "Sequential Identification and Ranking Procedures (with special reference to Koopman-Darmois populations)," by R. E. Bechhofer, J. Kiefer, and M. Sobel.....	SHANTI S. GUPTA	697
--	-----------------	-----

---
