

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Starshaped transformations and the power of rank tests.....	KJELL DOKSUM 1167
Bayes' method for bookies.....	ROGER A. PURVES AND DAVID A. FREEDMAN 1177
Estimation of a probability density function and its derivatives	EUGENE F. SCHUSTER 1187
Asymptotic theory of a class of tests for uniformity of a circular distribution	R. J. BERAN 1196
Asymptotically most powerful tests in Markov processes	GEORGE G. ROUSSAS AND RICHARD A. JOHNSON 1207
Test for monotone failure rate based on normalized spacing	K. DOKSUM AND PETER BICKEL 1216
Moments of a stopping rule related to the central limit theorem..	BRUCE M. BROWN 1236
Tests for monotone failure rate II.....	P. J. BICKEL 1250
Unbiased estimation of some multivariate probability densities	S. G. GHURYE AND INGRAM OLKIN 1261
Epsilon entropy of Gaussian processes	EDWARD C. POSNER, EUGENE R. RODEMICH AND HOWARD RUMSEY, JR. 1272
Some multiple products of polykays.....	DERRICK S. TRACY 1297
On partitioning a set of normal populations by their locations with respect to a control	YUNG LIANG TONG 1300
A class of rank order tests for a general linear hypothesis	MADAN LAL PURI AND PRANAB KUMAR SEN 1325
Generalized least-squares estimation of a subvector of parameters in randomized fractional factorial experiments.....	M. M. LENTNER 1344
Consistent estimation of a location parameter in the presence of an incidental scale parameter.....	J. PFANZGL 1353
Testing and estimation for a circular stationary model	INGRAM OLKIN AND S. J. PRESS 1358
A test of equality of two normal population means assuming homogeneous coefficients of variation.....	R. K. LOHRDING 1374
Nonparametric estimation of the transition distribution function of a Markov process	GEORGE ROUSSAS 1386
The canonical correlation coefficients of bivariate gamma distributions	R. C. GRIFFITHS 1401

Continued on back cover

Vol. 40, No. 4—August 1969

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35 and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. Abstracts and corrected galley proofs should be sent to the Managing Editor, K. J. C. Smith, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with two additional copies, on paper that will take corrections. Dittied or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log \bar{x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ad}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.
