New—THIS SERIES IN PROBABILITY AND STATISTICS

- **STOCHASTIC PROCESSES**
  by Emanuel Parzen. Intended for the student with a knowledge only of the calculus and the concepts of continuous probability theory, the book gives examples of the wide variety of empirical phenomena for which stochastic processes provide mathematical models, and provides an introduction to the methods of probability model-building. Parzen emphasizes applications of stochastic processes, and includes an excellent spread of graded exercises. June 1962, 336 pp., $10.50.
- **BASIC CONCEPTS OF PROBABILITY AND STATISTICS**
  by J. L. Hodges, Jr. and E. L. Lehmann. Prelim. ed. now available. Final ed. 1963.
- **PROBABILITY THEORY**
  by Lajos Takács, Samuel Karlin, and Herbert Robbins. 1963
- **PROBABILITY**
  by A. Rényi. 1963
- **FOUNDATION OF TIME SERIES ANALYSIS & STATISTICAL COMMUNICATION THEORY**
  by Emanuel Parzen. 1963

Multistage Inventory Models and Techniques

Edited by Herbert E. Scarf, Dorothy M. Gilford, and Maynard W. Shelly

This volume is the first of a series devoted to mathematical methods in logistics sponsored by the Office of Naval Research in cooperation with the Institute of Management Sciences. Four papers are included in this study, with additional expository papers submitted by the judging committee. *Office of Naval Research Monographs on Mathematical Methods in Logistics.* December. About $8.75

Measurement in Economics

STUDIES IN MATHEMATICAL ECONOMICS AND ECONOMETRICS IN MEMORY OF YEHUDA GRUNFELD

Carl Christ and Others

Twelve authorities in the field of econometrics here present essays in honor of the memory of an outstanding young Israeli economist, Yehuda Grunfeld. The book is divided into four sections: A. *Theory and Measurement of Consumption;* B. *Theory and Measurement of Production;* C. *Theory and Measurement of Monetary Phenomena;* D. *Econometric Methodology.* December. About $8.75

Tables of Random Permutations

Lincoln E. Moses and Robert V. Oakford

This volume provides blocks of random permutations for samples of 9, 16, 20, 30, 50, 100, 200, and 1000 items. Each permutation block is separated for quick use and marking, either to avoid duplication or for replication of a random sequence. The technique for generating these, or similar, permutations on electronic computing machinery is described. December. $7.00

LECTURES IN APPLIED MATHEMATICS

These lectures were given at the Summer Seminar held at the University of Colorado, Boulder, Colorado, July 24–August 19, 1960.

Volume

1. *Lectures in statistical mechanics*, by G. Uhlenbeck and G. W. Ford, 1962.
2. *Mathematical problems of fundamental relativistic physics*, by L. B. Segal, 1962.
3. *Perturbation of spectra in Hilbert space*, by K. O. Friedrichs.
4. *Quantum mechanics*, by V. Bargmann.

25% discount to members

Orders for single copies and standing orders for this series should be sent to the

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give **complete coverage of published papers in the field of statistical theory** (including associated aspects of probability and other mathematical methods) **and new published contributions to statistical method.**

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics; Biometrika; Journal, Royal Statistical Society (Series B); Bulletin of Mathematical Statistics; Annals, Institute of Statistical Mathematics;* and a further group of six journals are abstracted on a **virtually complete** basis as follows: *Biometrics; Metrika; Metron; Review, International Statistical Institute; Technometrics; Sankhyā.* There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about **400** words long—the recommendation of UNESCO for the 'long' abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) is given in detail to facilitate contact in order to obtain further detail or request an off-print. **The journal is published quarterly and contains approximately 750 abstracts per year.**

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. **A unique aspect of this journal** is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

Annual Subscription £5 (U.S.A. and Canada $16.00)
Single Number 30s. (U.S.A. and Canada $4.50)

INTER AMERICAN STATISTICAL INSTITUTE

Pan American Union

Washington 6, D. C.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

T. W. Anderson, Department of Mathematical Statistics, Columbia University, New York 27, New York

President-Elect:

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle 5, Washington

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Program Secretary:

Dorothy Gilford, Office of Naval Research, Washington 25, D.C.

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall, Stanford University, Stanford, California

Editor:

J. L. Hodges, Jr., Department of Statistics, University of California, Berkeley 4, California

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are $10.00 per year for residents of the United States or Canada and $5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Construction of Rotatable Designs Through Balanced Incomplete Block Designs
M. N. Das and V. L. Narasimham 1421

On Constructing the Fractional Replicates of the 2^m Designs with Blocks
M. S. Patel 1440

Notes:

A Fluctuation Theorem for Cyclic Random Variables.....Meyer Dwass 1450

Determining Bounds on Expected Values of Certain Functions
Bernard Harris 1454

On Bounds of Serial Correlations.....K. C. Chanda 1457

On the Distribution of Sums of Squares and Cross Products of Normal Variates in the Presence of Intra-Class Correlation.....Donald F. Morrison 1461

On a Property of a Test for the Equality of Two Normal Dispersion Matrices Against One-Sided Alternatives.....Wadie F. Mikhail 1463

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

AAAS SECTION U MEETING (IMS Cosponsored)—Philadelphia, Dec. 26–30, 1962.
EASTERN REGIONAL MEETING—Cambridge, Mass., May 5–7, 1963.
CENTRAL REGIONAL MEETING—Madison, Wisc., June 13–15, 1963.
WESTERN REGIONAL MEETING—Eugene, Ore., June, 1963.
EUROPEAN REGIONAL MEETING—Copenhagen, July 8–10, 1963.
ANNUAL MEETING—Ottawa, Aug. 30–Sept. 1, 1963.

Abstracts should be submitted in duplicate to the Editor, on abstract blanks which can be found in the back of every *Annals*, beginning with the March 1961 issue, or can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
